

Seonghyun

AI-agent & machine-learning engineer

✉ ironwar0000@naver.com 🗓 gogog01-29-2021

Summary

- Full-stack and machine-learning engineer working on agentic AI systems — orchestrator-worker loops, tool-augmented reasoning, and stochastic risk models of human-AI interaction.

Skills

Agentic AI: Orchestrator-worker loops, tool/function calling, escalation

Machine learning: Reinforcement learning, preference optimization, agent loops

Risk modeling: Stochastic models, Monte Carlo, human-AI interaction risk

Interests

Human-AI interaction risk: Trust dynamics, bias migration, flash-risk
